

BluOS 2.14.0

With the latest BluOS software, version 2.14.0, you can now create the ultimate Dolby Digital® surround sound system with a PULSE SOUNDBAR and a pair of PULSE FLEXs as rears. Stream and listen to millions of tracks in CD-quality with support for Deezer HiFi. Browse and discover music faster and easier with a new supercharged music engine that is optimized for performance. Other enhancements include support for related artist radio and explicit filter on TIDAL, playlist browsing on Deezer, and optical input auto sense for supporting BluOS-enabled players.

Software Requirements

BluOS Controller for iOS, version 2.14.0 or higher

BluOS Controller for Android and Kindle Fire, version 2.14.0 or higher.

BluOS Controller for Mac OS, version 2.12.3 or higher.

BluOS Controller for Windows PC, version 2.12.3 or higher.
